Formcraft

DESIGN AND CONSTRUCTION · KAMPALA, UGANDA

Bridging blueprint to bench.

Designing spaces. Empowering communities. One design-build value chain: BIM-led design, structural concrete and hand-crafted joinery.

MODEL · MAKE · BUILD

Company pitch · October 2026

THE PROBLEM

East Africa builds with craft, but designs as if it doesn't

Designers and artisans

Work apart

Artisans call abstract design "okwekoza", pretence. Designers draw what workshops can't build.

Machinery

Out of reach

Panel saws and CNC cost too much for one artisan, so quality and speed suffer.

Craftsmen

Undervalued

The people who make most building parts sit outside the formal, digital chain.

Materials

Hard to source

Seasoned timber and reliable product data are hard to find, so prices and quality swing.

BIM

Imported

Libraries model foreign products; local BOQs don't match what gets built.

Young professionals

No first job

Graduates struggle to get the supervised project work they need for registration.

OUR STORY

From one chair to a design-build company

2023

First bespoke furniture piece

2025

Formal launch of Formcraft

2026

Registered company; BIM system and tools built

Next

10 design contracts, double the artisan network, trade training

2028

USD 1M revenue, 20% of profits to artisans, Kenya, Rwanda, South Africa

Emlyn Atochon

Co-Founder and Lead Designer, Formcraft Studio, workshop creative director

Peter Isingoma

Co-Founder and Real Estate Lead, Formcraft Concrete and real estate

Esther Ahumuza

Marketing, Sales and Interior Design

WHAT WE DO TODAY

Furniture and interiors pay the bills and teach us production

Our Kampala workshop makes furniture, kitchens, wardrobes and doors to order. That gives Formcraft what most BIM companies lack: real knowledge of how things are made, what they cost and how long they take.

Custom furniture **Joinery** **Interior design**

Design studies

Project	Work
Ggaba Apartments	Furniture and joinery, 12 units
Lucy's Kitchen	Interior outfit
Lydia Residential	Residential design
Green Yard	Café and garden
Karwani Complex	Coffee factory
Muyenga school	School project
Ogala Residence	Client design study, 95 boards
Bamboo hut	Concept, form-found in Dynamo

THE COMPANY

Four divisions, one point of accountability

Studio

BIM and CAD design, pre-construction, permits, visualisation

Tech: Formcraft Tools, renders, model hosting

Construction

Building what the model promised, with partner contractors

Tech: bid sessions, 4D progress, site tablets

Concrete

Precast elements and green concrete from local aggregates

Tech: product families, quotes from model quantities

Stores

Furniture, joinery and goods from the Kampala workshop

Tech: recipes, 3D product pages, cut lists

Hire us · clients and developers

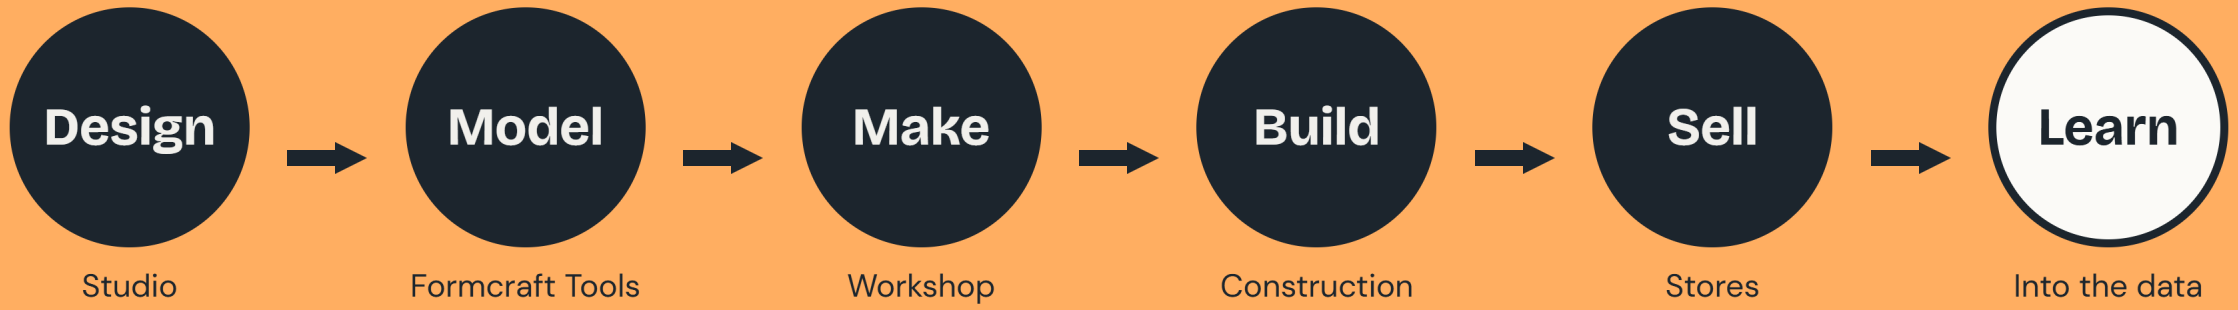

Shop · homes and offices

Join · artisans and students

Back us · investors and donors

THE VALUE CHAIN

Every product moves through one loop, and the data comes back.

STUDIO

Plot to permit in 9–14 weeks, priced in the open

10%
Residential, traditional drawings

15%
Commercial, traditional drawings

25%
Commercial with full BIM

How the design fee splits across the package

- Architecture and interiors 20%
- Structural and civil 20%
- Electrical and plumbing 15%
- Quantity surveying and BoQ 15%
- Landscape 5%
- 3D visualisation 5%
- Soil investigation 5%
- Site and boundary survey 5%
- Submissions and permits 10%

STORES AND THE WORKSHOP

Made to order in Kampala, built in front of you

1

Brief

A photo or sketch of what you want

2

Agree

Design and price agreed, deposit paid

3

Build

Timber sourced; workshop visits welcome

4

Deliver and fit

Usually 2–3 weeks from deposit

What we make

Furniture, kitchens, wardrobes, panelling and doors in Mvule, Mahogany, Cypress and Eucalyptus, plus site gear and goods.

How the technology helps

Each product becomes one recipe: a 3D product page with size sliders, an instant price, a cut list for the bench, and a BIM family for architects.

CONCRETE

Precast and green concrete, specified straight from the model

Formcraft Concrete supplies precast elements and green concrete from local aggregates, with Tororo, Hima and Bamburi cements. Supply grows through partner producers.

Model to quote: every product is a BIM family, so a contractor's model quantities become a supply quote, and carbon figures feed sustainability reports.

- **Lintels**
- **Pavers**
- **Facing bricks**
- **Facade panels**

CONSTRUCTION AND BIDDING

We design and manage; vetted partners bid and build

1
Brief
House, office, fit-out

2
Design
Studio to permit set

3
Tender pack
From the model: drawings, BOQ, 3D

4
Bid session
Partners price one BOQ online

5
Award
Line-by-line comparison

6
Track
4D progress, valuations, as-built

For clients

Fair, comparable prices on one priced model, and one company accountable for quality

For contractors

A steady flow of well-documented work without design risk

Formcraft's role

Supervision, QC, valuations, milestone sign-offs and site safety

TEMPLATE BUILDS

A home library designed by young professionals

TEAM

Form a team

Graduate architect, engineer and QS

DESIGN

Design a home

For 50 × 100 ft plots, on cloud seats

APPROVE

Registered sign-off

Architect and engineer review and stamp

RELEASE

Library release

Plans, BOQ, renders, 3D viewer

EARN

Royalties

On plans sold and a share on builds

Young professionals

Real projects, income while unregistered, and a portfolio of approved, built work

Toward registration

Each project leaves a supervised experience record. We will ask the registration boards to recognise it.

Homeowners

Affordable approved plans, an accurate BOQ, and the option to build with a vetted partner

COMMUNITY AND MAKERS

Formcraft sets the market for the work. Makers focus on the craft.

Carpenters, welders, sculptors, upholsterers, designers and students join a network that gives them orders, tools and training.

1 · Sign up with trade and photos

2 · We meet and approve

3 · Take orders

Fair pricing

Agreed up front

Shared machines

Workshop space and tools

Steady market

Stores orders, jobs board

Training

Through the Academy

ACADEMY

Skills for designers and craftsmen, without needing a powerful PC

BIM and CAD courses

Revit, ArchiCAD, Blender and Formcraft Tools, built from our internal training

Workshop sessions

Craft skills, safe machine use, and reading model-based drawings and cut lists

Internships

Real project work in Studio, the workshop and on site

Students log in to **Formcraft cloud workstations** from any laptop, so the cost of a high-end PC no longer stops anyone from learning BIM.

REAL ESTATE

Developments people can see being built

Formcraft develops property and opens projects to community, verified and partner investors. Each development lists its stage, units, term and target.

Capital is at risk. Funds are held until a raise closes; escrow and Capital Markets Authority approval are being arranged.

WHAT THE TECHNOLOGY ADDS

Investors and buyers follow progress on a live 4D project link, with renders and site updates from the same model.

1	2	3
Community	Verified	Partner

Investor levels

PLANT A TREE AND SUSTAINABILITY

We use timber, so we plant it back

Mvule

Milicia excelsa, the hardwood of Ugandan joinery

Musizi

Maesopsis eminii, a fast-growing timber tree

Ffene

Jackfruit, for food and shade

Anyone can give

Plant 1, 5, 10 or a custom number of trees from the website.

Measured in the model

Carbon data in every family and green concrete figures let each project report its footprint.

PART THREE · THE TECHNOLOGY

One data spine under every division

Formcraft Tools, the family factory, the Bench app, our cloud and our render engine share the same recipes, codes, rates and rules.

Formcraft Tools | Family factory | Bench | Cloud | Blender renders | Open BIM

THE ECOSYSTEM

Six layers, from modelling software up to people

People	Clients · homeowners · firms · makers · students · partner contractors · investors
Website hub	One account · Stores · family store · templates · project links · bids · Academy
Formcraft cloud	Hosted central models · AI model manager · cloud workstations · Blender GPU renders
Formcraft app	Rulebooks · family recipes · project data · IFC engine · Claude · Bench
Connectors	Revit add-in and MCP · ArchiCAD GDL · Rhino · Blender · Robot · Navisworks · IFC, BCF
Authoring tools	Revit · ArchiCAD · Rhino · Blender · Robot · Navisworks · free fallbacks

FORMCRAFT TOOLS

Software that starts and ends a project the Formcraft way

Manage

Standards, templates, sheets, QA, worksharing, reviews

Model

Family factory, casework, MEP and structure help

Flow

Everyday speed for every Revit user

Build

BOQ, progress, 4D and 5D for QS and managers

Bench

A phone app for craftsmen (new)

50+

Formcraft tools on our MCP server, so Claude works inside Revit by our rules

1 account

One sign-in and one settings page across all modules; buying happens on the website

THE FAMILY FACTORY

One recipe, many products

In
Photo, datasheet or maker visit

→

Core
Family recipe with sizes, materials, clearances

→

Check
Flex tests and a named reviewer

→

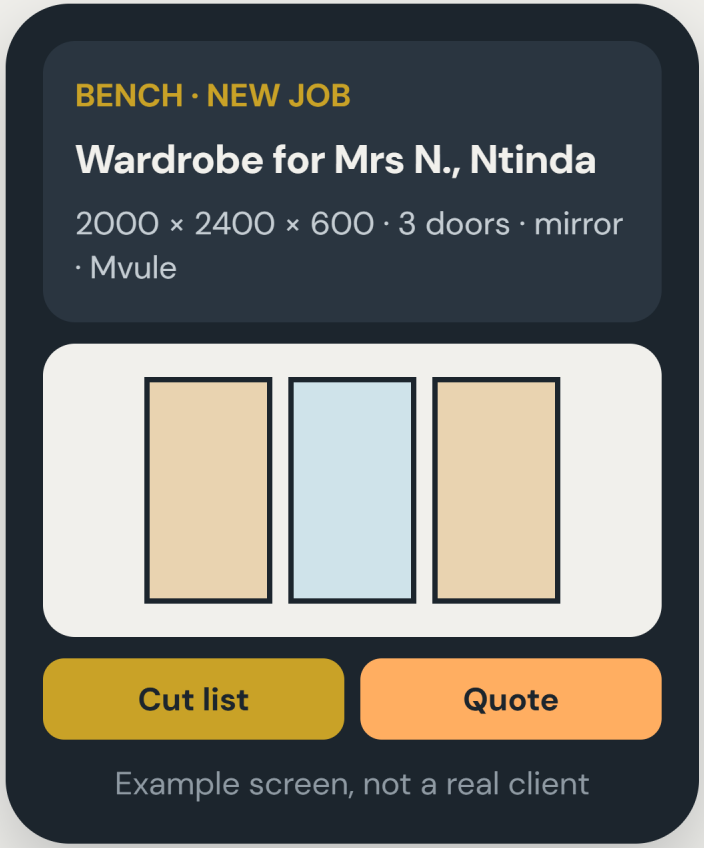

Out
Revit · ArchiCAD · web 3D · cut list · render

604
hospital families catalogued for the first pack

371+
families built in Revit by our engine overnight

4
detail levels, from a light box to true shape

2
platforms from one recipe: Revit and ArchiCAD

FORMCRAFT BENCH

BIM for the carpenter, without learning BIM

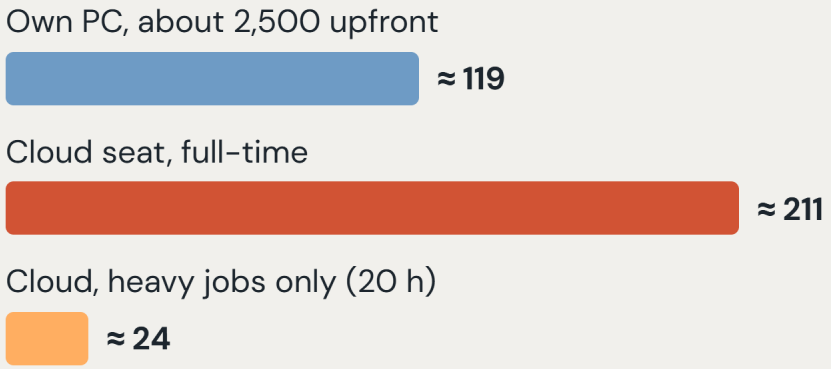

1. Photograph the space and take key measurements
2. Show the client's inspiration picture
3. Adjust by voice or text: "three doors, Mvule"
4. See a buildable 3D model on the spot
5. Get the cut list, sheet layout and quote

Free for craftsmen, on ordinary Android phones. Built on the same recipes as our families, so every design can actually be made.

FORMCRAFT CLOUD

Hosting, cloud seats and top-tier renders on our own servers

Monthly cost per seat over two years (USD)

Keep PCs for daily work; rent the cloud for peaks and rendering.

Hosted central models

One sandbox per client, with an AI manager for audits and backups

Cloud workstations

Extra modellers for big projects, joined by a link

Blender render service

For real estate developers: a 4K still costs about 0.80 of GPU time; a 30-second walkthrough about 165

OPEN BIM, MANY TOOLS

If one vendor says no, another tool picks up the work

Job	Main	Backup	Free fallback
Building models	Revit	ArchiCAD	Bonsai, FreeCAD
Families and objects	Revit families	ArchiCAD objects	IFC objects
Structural analysis	Robot	ETABS, Tekla	OpenSees
Complex shapes	Rhino	Blender	Blender
Clash checks	Navisworks	Solibri	IfcOpenShell
Rendering	Blender Cycles	D5 Render	Blender
Energy and carbon	to choose	One Click LCA	EnergyPlus

Shared through open standards: IFC for models, BCF for issues, COBie for handover. Our rules and data live in the Formcraft app, not in any one vendor’s files.

THE WEBSITE

One front door and one account for everything

Designed (38 boards)

Studio · Stores · Concrete · Template builds · Projects · Community · Academy · Real estate · Invest · Plant a tree · Journal · Account

To add for the ecosystem

Family store · Formcraft Tools · Licences and seats · Project links · Bid sessions · Cloud and hosting · Render orders · Bench · Machine booking

Built with React and Firebase. Payments by mobile money (MTN, Airtel) and card through Flutterwave. Design for the whole ecosystem from the start, even where pages come later.

HOW FORMCRAFT EARNS

Fourteen revenue streams on one platform

Stream	From
Furniture, joinery, interiors	Today
Design and permit fees	Today
Healthcare and custom families	Q4 2026
BIM system setup for firms	Q1 2027
Formcraft Tools licences	Q1 2027
Blender render service	Q1 2027
Model hosting and AI manager	Q2 2027

Stream	From
Cloud workstations	Q2 2027
Template plans and builds	Q2 2027
Bench premium, supplier partners	Q2 2027
Shared machine time	Q2 2027
Bid management and supervision	Q3 2027
Precast and green concrete	With partners
Academy courses	2027

Highlighted rows earn today. Later dates are proposed and follow the roadmap. Clients are billed in USD.

WORK WITH US

Twelve ways to collaborate

Template designers
Graduate architects, engineers, QSs

Plan approvers
Registered architects and engineers

Partner contractors
Vetted firms who bid and build

Makers
Carpenters, welders, upholsterers

Product capture
Photograph and measure products

BIM modellers
Revit and ArchiCAD on cloud seats

Render artists
Blender lighting and finishing

Developers
React, C#, Python, GDL

Firms using our system
Adopt Formcraft standards and tools

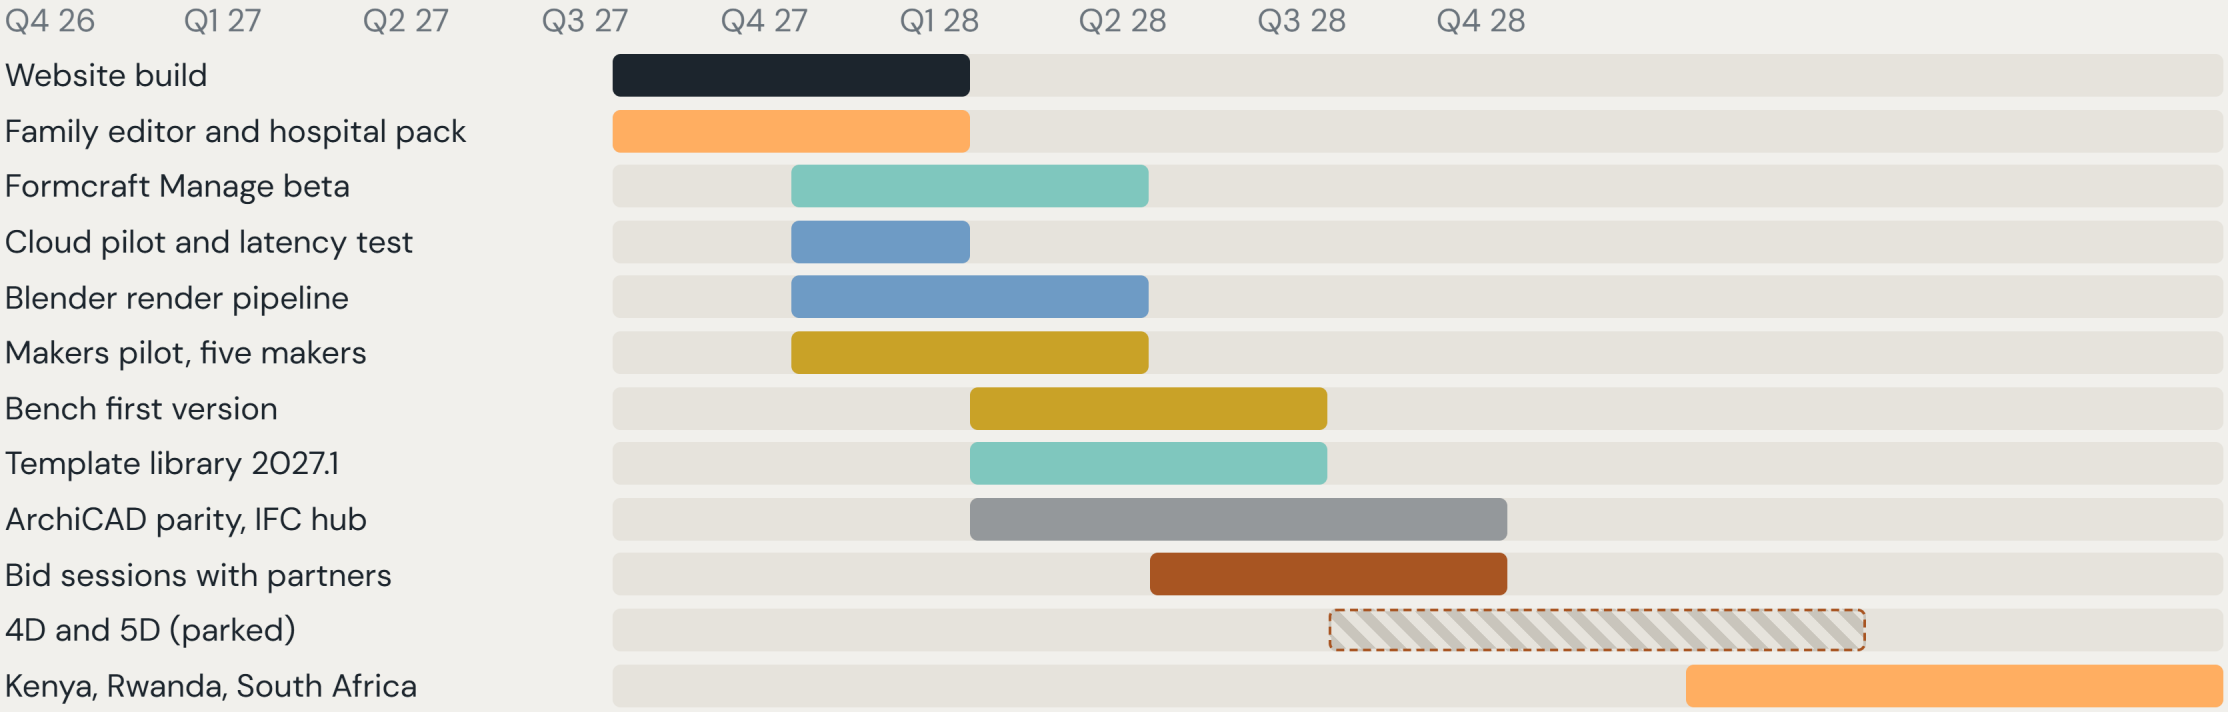

Suppliers
Catalogues become families

Academy trainers
Teach BIM and craft

Backers
Investors and donors
